

The operating system for lawyers.[®]

Introducing the first collaborative case management platform for litigators.

BROCHURE

Case Management & Analysis

Introducing a revolutionary case management and analysis platform for lawyers. Everchron brings together all of the information you need in a collaborative workspace for your entire team. And it does it in a way that's fast, effective, and intuitive.

Master the facts of your case

Everchron creates a timeline of a case's key documents and data, drawing intelligent connections to witness testimony, facts and issues that reflect and reveal critical information about the case.

- Investigation
- Complaint
- Document Discovery
- Depositions
- Motions
- Trial
- Appeal

Going beyond e-discovery

Everchron helps your team organize, analyze and discuss key information throughout the life of a case, from the complaint to depositions, motions, trial and appeals.

The Benefits

- ✓ Trial mindset from the beginning of a case
- ✓ Improved client communication and access
- ✓ Increased efficiency
- ✓ Better internal communication

Chronology

Everchron connects your key documents, facts, and witnesses in a dynamic chronology that is always up to date.

Build your chronology as a team

Work as a team to categorize, summarize and tie together your key documents. Designed by lawyers to work the way that lawyers actually work, Everchron leverages information that is input into the system so you can more efficiently analyze case-critical information.

Preserve team knowledge

Too often, one or two attorneys on your team are responsible for the facts of the case. Everchron preserves your team's best ideas and work product for everyone's benefit, throughout the life of a case.

E-discovery finds the needles, we manage them

Everchron takes over where document review tools leave off, allowing you to perform a deeper analysis of your documents, facts and witnesses. Go beyond rote issue tagging and work with your documents in a robust platform built for legal and factual analysis.

Trial mindset from the outset

Easily search through the entire case to uncover a cohesive case story and analyze connections between events, documents, and witnesses. With one click, instantly filter your chronology down from all key documents, to just the hot documents, or down further to any relevant issue or witness.

The Benefits

- ✓ Build your chronology collaboratively
- ✓ Unprecedented transparency for clients
- ✓ Immediate access to key documents

Master File

Until now, master files have been unwieldy and tedious to search. Everchron is designed to make reviewing and searching a case's master file faster and easier than ever before.

Instantly find your case documents

Everchron provides an intuitive filing system for all of your case documents - pleadings, motions, discovery, transcripts, correspondence and court orders. You can quickly filter your master file to find exactly what you need without the typical noise in a document management system.

Advanced Viewer

Everchron's advanced viewer allows you to instantly review, download, comment and share your case documents.

Built for complex litigation

Everchron is built for cases of all sizes including the largest, most complex cases with multiple dockets and numerous parties.

Automated with Docket Sync

Everchron's Docket Sync feature allows users to sync up their matters with any docket on PACER as well as proceedings before the ITC, PTAB or TTAB.

The Benefits

- ✓ Instant retrieval of any case document
- ✓ Intuitively organized for litigation
- ✓ Always up-to-date access for clients

Profiles

Preparing for depositions and witness examinations can be time consuming. Everchron automates the tedious part of witness prep, so you have more time for analyzing, outlining and drafting.

Automatically generated

Witness files are automatically generated and optimized, by connecting individual witnesses with related evidence and case documents.

Instant binders

Our intelligent system brings together related information and document sets, which can be used for witness preparation and quickly converted into hard copy binders.

Advanced analytics

Everchron makes connections between witnesses based on their involvement in the case, their relationships with each other and other pertinent facts and issues.

Unified witness file

Witness files in Everchron link with other key documents, such as filings and depositions, so you get a unified picture of their testimony and relevance to the issues in the case.

The Benefits

- ✓ Prepare faster and better for depositions and examinations
- ✓ One-click witness reports and exports
- ✓ Capture how witnesses relate to key issues

Transcripts

Transcripts are a fundamental part of many cases. Everchron integrates your transcripts with your core documents and witnesses, so you can incorporate testimony into your analysis and preparation.

Native transcript viewer

Everchron's proprietary transcript viewer provides a clean read for your deposition and hearing transcripts, as well as the ability to mark up excerpts.

Hyperlinked exhibits

With our Hyperlinking Service, have all of your transcripts fully hyperlinked to their cited exhibits. Click to view the exhibits side by side with your transcript.

Cross-transcript search & reporting

Run complex and category searches across all your transcripts, and generate insightful reports with excerpts and analysis.

Video playback

Utilize Everchron's native video player to view your deposition videos alongside your transcript bringing testimony to life.

The Benefits

- ✓ Analyze and discuss testimony as a team
- ✓ View exhibits and video alongside your transcripts
- ✓ Easily search across all of your transcripts

Secure Collaboration

Everchron utilizes bank-grade security, encrypting data and documents in transit and at rest, to ensure secure collaboration.

AES 256 Encryption

Documents, metadata, OCR text, and comments are encrypted at rest, both at the database and file system level using AES 256 encryption.

Certified Data Centers

AWS continually manages risk and undergoes recurring assessments to ensure compliance with industry standards.

World Class Protection

Everchron's data is stored in Amazon Web Services' (AWS) world-class, highly secure data centers, staffed 24x7 by trained security guards.

Penetration Tested

Our web application and network infrastructure undergo security audits and testing by an independent security firm to maximize the security of your data.
